
AcouSort AB reaches major milestone signing License and Distribution Agreement with Instrumentation Laboratory

Lund, Sweden 8 June 2018

AcouSort AB (publ) (AcouSort) today announced the signing of a License and Distribution Agreement with Instrumentation Laboratory (IL).

After the successful completion of several joint feasibility projects exploring the application of AcouSort's proprietary ultrasound-based technology for blood/plasma separation, IL will implement the technology to enable new features in some of its *in vitro* diagnostics systems.

Torsten Freltoft, CEO AcouSort, comments:

"This License and Distribution agreement with IL is a major first milestone for AcouSort in commercializing our ultrasound-based separation technology. The agreement is of significant value for AcouSort, with minimum royalty payments to reach several hundred thousand euro per year, but also important as a model for future license agreements within other application fields."

About AcouSort

AcouSort AB (organization number 556824-1037) founded 2010 is a medtech company based in Lund., Sweden focused at acoustic sample preparation and separation technology. AcouSort has developed a platform technology using acoustophoresis, which is an innovative method enabling the separation, up concentration or wash of biological cells or other particles for bioanalysis using ultrasound. Separation or wash of cells are central processes in handling blood samples or cell populations in the lab, and by implementing AcouSort's technology it is possible to automate and implement these traditionally manual processes into point-of-care devices. AcouSort's business model is to work with life science partners in order to implement the separation technology into their analytical instruments. AcouSort is listed at the Swedish stock exchange, AktieTorget.
